

# Waste containers

HYGIENIC. SIMPLE.

# Waste containers

Safe removal of infected waste is also of great importance. For this we offer an effective solution by removing the waste by means of high quality waste containers. The containers are leakproof and secure a safe removal of needles, syringes, scalpels, blood lancets, glass cannulas etc.

The waste containers small and large are conical, stackable containers and therefore reduce the stocking space need in the warehouse. These containers are equipped with 2 valves which make sure the infectious material stay in the container in case it should fall.

The Sharpak™ container has a unique safety-closure-system with an adjustable filler. The Sharpak™ containers are also fully autoclavable till 138 °C.

The containers are stackable as well, so space saving.

## PACKAGING AND ORDERING INFORMATION

<b>Waste container large 90 in a box</b>	<b>16142</b>
<b>Waste container large 30 in a box</b>	<b>16143</b>
<b>Waste container small 300 in a box</b>	<b>16140</b>
