**Patient Drapes.  
Visionary Prevention  
And Protection.**

A Trusted Leader In Prevention And Protection, Microtek Offers The Complete Line Of Advanced Patient Drapes For Ophthalmic and ENT Procedures.

# Microtek. Providing safety, innovation and risk reduction in patient draping.

**“Delicate procedures require patient drapes that not only reduce risks, but allow easy access to patient anatomy. Microtek patient drapes deliver optimal visibility, while providing comfort and reliable protection. All of which mean better patient outcomes.”**

For more than two decades, Microtek Medical has been the trusted source of innovative patient draping solutions for risk reduction and protection. Microtek patient draping reduces the risks of infectious disease transmission; protects healthcare professionals in every type of ophthalmic and ENT environment; and helps improve clinical outcomes by maximizing the protection available for both patients and medical staff during procedures.

There is no better example of this dedicated expertise than our complete range of patient drapes specially designed for ophthalmic and ENT procedures.

## Innovative thinking makes the difference in patient draping.

In both ophthalmic and ENT procedures, innovative patient draping solutions from Microtek have significantly advanced the level of risk reduction and protection. This is not just about producing drapes that meet needs. It's about designing more intelligent draping solutions that function effectively during every procedure. It's the difference made by extra features and thoughtful advances that can enhance the clinical environment and even help improve outcomes.

## The special needs of ophthalmic and ENT procedures require something extra behind every patient drape: Microtek.

You already know Microtek as the long established leader in drapes for a diverse range of applications. The same thinking has been applied to patient draping designed exclusively for ophthalmic and ENT surgery. Where there are unique needs from special drainage ports for fluid release during eye procedures to easy access instrument pouches for ENT, Microtek has created specialty specific patient drapes with added features to assure ease of use during even the most intricate, time sensitive procedures.

## Why draping solutions should be designed for patients and medical professionals.

Each day, both healthcare professionals and patients come face to face with the serious risks of contamination and infection in ophthalmic and ENT environments.

**"Procedures today require microscopic precision. Microtek patient draping not only protects, but helps assure I can focus on what matters...my patient."**

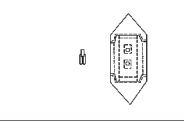

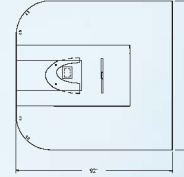

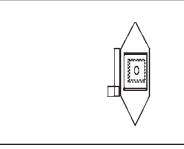

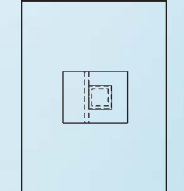

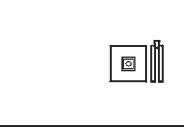

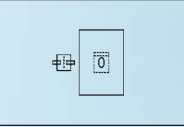

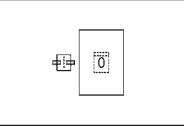

It's impossible to know every potential risk people may face in every clinical situation. It is, however, possible to protect every clinical environment.

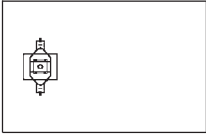

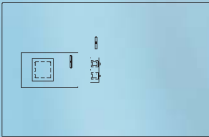

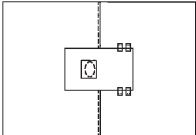

With a comprehensive line of advanced draping solutions specially designed for the procedures you perform on your patients, Microtek offers the key to peace of mind when it matters most.

**Order your Microtek patient drapes from the selection on the following pages, or visit [www.microtekmed.com](http://www.microtekmed.com) to see our complete online catalog.**
